

ARROW ONE ANGUS

Open House & Cowboy Auction

SUNDAY - 2:00 PM

MARCH 20, 2022

AT THE RANCH SOUTH OF
NORTH PLATTE, NEBRASKA

SELLING 50 ANGUS & SIMANGUS BULLS

Complimentary Lunch at 1 PM

WELCOME

We would like to invite you to our 19th Annual Bull Sale on Sunday, March 20th 2022. This year we will be having an Open House and Cowboy Auction at our place south of North Platte, Nebraska. The sale will be at 2:00 PM central time and lunch will be served before the sale at 1:00 PM. Video of the bulls will be on our website, ArrowOneAngus.com.

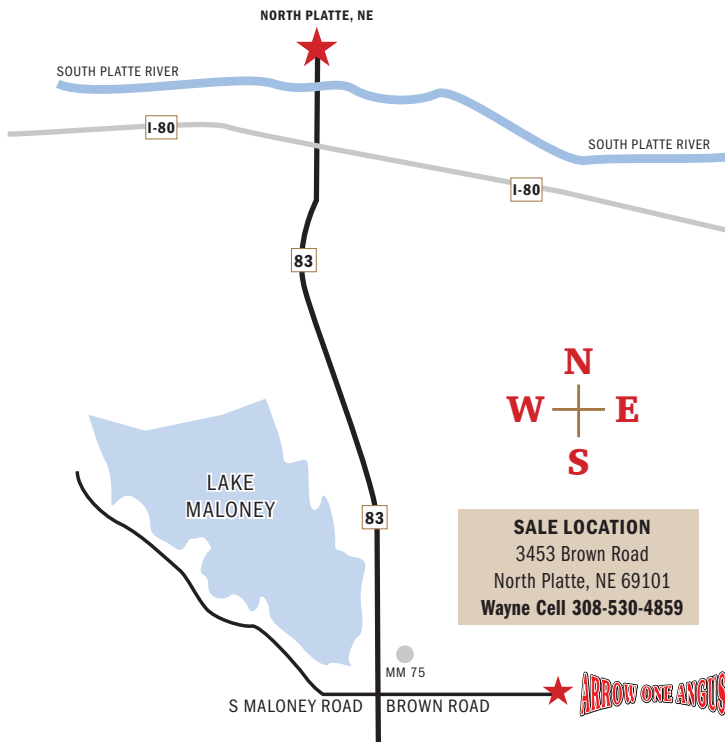

We will be selling approximately 50 bulls - 35 Yearling Angus, 2 Yearling SimAngus, 6 Two-Year Old Angus and 6 Two-Year Old SimAngus. Please note: the SimAngus bulls are not registered unless you request.

Our cattle have been on a complete vaccination program with Stockman Vet Clinic and are semen checked and tested BVD Negative. The feed program the bulls are on is corn screenings, distillers, and a hay mix ration. They were ultrasounded on February 10, 2022. As always, our goal is stout, long bodied cattle with extra muscle and top, fertility, good feet and total performance maternal traits for profitability. The bulls come with our breeding and soundness guarantee.

You have a personal invitation to our ranch to evaluate our cattle, including cows, calves, bulls and heifers. The coffee is on and we would love to visit and show you what we have done with our genetics.

Wayne and I are very thankful to each of you, we do not take for granted the importance of all our friends, family, and wonderful customers that have attended our sales through the years. We personally would like to say THANK YOU! We value your input and your great support of our program.

*Sincerely,
Wayne and Dona Rundback*

ARROW ONE ANGUS

SUNDAY - 2:00 PM CT

MARCH 20, 2022

AT THE RANCH SOUTH OF
NORTH PLATTE, NEBRASKA

Complimentary Lunch at 1:00 PM

Wayne and Dona Rundback
3453 Brown Road
North Platte, NE 69101
Wayne Cell 308-530-4859

SALE LOCATION *Approx. 7.5 miles south of North Platte, NE*

Go south of North Platte on Highway 83 for 6 miles to mile marker 75
Turn east on Brown Road and go 1 1/2 miles
We have a pipe entryway with our name on the top!

VETERINARIAN

Stockman's Vet Clinic 308-532-7210
3666 N Stockman Rd | North Platte, NE 69101

TERMS AND CONDITIONS The cattle sell under the suggested Terms and Conditions of the American Angus Association. These terms are available at anytime upon request.

LIABILITIES All persons attending do so at their own risk. Arrow One Angus assumes no liability, legal, or otherwise, for any accidents which may occur.

GUARANTEE All bulls selling for \$3,000 or more are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided. Or if the buyer prefers, credit toward one bull will be given in the following year's sale minus salvage value of the injured bull. Please notify us as soon as possible should injury occur and preferably before September 1st, 2022.

SUPPLEMENT Scrotal data will be available on a supplement sheet sale day in addition to any other announcements.

**All bulls will be delivered free of charge starting
April 1, 2022 within a 150 mile radius.**

VIDEOS AVAILABLE AT
ARROWONEANGUS.COM

ARROW ONE ANGUS

Procedures for our Cowboy Auction

This is how our Cowboy Auction will be conducted. First, register for a buyer's number. Viewing of the bulls will be prior to sale time of 2:00 p.m. A base bid will be displayed for each bull in the sale building, east of the bulls. We will sell the bulls in numerical order.

If you would like to purchase a bull, raise your card and if no one else raises a card, you are the proud owner of an Arrow One Angus bull! If more than one person raises their card, we will raise the price in increments until only one card is held up.

All bulls will be fertility tested and will sell as guaranteed breeders!

VIDEOS AVAILABLE AT
ARROWONEANGUS.COM

Angus EPD Definitions

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Feedlot Value (\$F), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).
